

Conocimiento de los cursos de la salud: que es Terapia Ocupacional?

VTBLS Silva, LCM Mel, GKOL Lacerda, MPRM Medeiros, MCAC Costa
Universidade Potiguar, Natal - Rio Grande do Norte, Brazil

The work has as objective checks the knowledge of the pupil of the courses for the health of a private university of the Big Rio of the North is in Occupational Therapy, when there is analysing the way like this growth eo level of spread of the course of Occupational Therapy. The investigation is of nature exploratória, a quantitative nature. The content of the questions of the questionnaire were con10: Occupational therapy in other words, areas of activities of sensibilização and of work of the profession. The lifting belonged to 40 pupils with courses of biology, nutrition, physical education, pharmacy, physiotherapy, of the speech, psychology, medicine, enfermagem, dentistry, 04 questionnaires yearly. Nevertheless the importance of the profession was possible checked a lack of knowledge of the pupils on the work and the areas of activities of occupational therapists. This was possible the lack of knowledges checked on the occupational therapy it is an important factor for this understanding Occupational Therapy is tied like a science and a profession. In this way, each professional institutions and it has the principal paper of spread to dare conversations, you graze on distributions, workshops, to work with other professionals I attend aptitudes. They have bigger political and professional articulation discussions.
