Practical Use of the Logic Model in Project Management and Evaluation

Juanita Bester, Maatje Kloppers

Stellenbosch University, Cape Town, Western Cape, South Africa

During this presentation the basic concepts and underlying theory in the use of the logic model will be introduced. The presenter will give a brief theoretical overview of concepts central in constructing a logic model and to illustrate the interconnectedness of the concepts. Practical use of the logic model as a tool to plan for project intervention and evaluation will be illustrated as well as what the possible benefits are of using it in clinical practice and evaluation research.
